Knights Templar:
Free Energy, Mary Magdalene, and Reincarnation

written by ChrisWingMaker June 2025

updated: January 1st, 2026

Timothy Hogan is Grand Master of OTSI, the Order of the Temple of Secret Initiates, a modern conglomeration and reassembly of multiple Templar lineages. He is presenting information that the Templars feel is appropriate to now bring forward into the public domain. The concepts that are most interesting to me are free energy technology, the truth of Mary Magdalene, and the reintroduction of reincarnation into Christian doctrine.

According to Tim, the Knights Templar possess 6 arks like the Ark of the Covenant. The arks are ancient free energy technology that were used to power the civilization of Atlantis. They are designed to be filled with alchemically produced mana and placed in a giant pyramid like the Great Pyramid of Giza. The ark then acts as a battery and the pyramid broadcasts free energy across the planet. The Great Pyramids were originally built in Atlantis (or earlier) for this purpose, and the Ancient Egyptians later became stewards for these structures. The arks can be recreated today but these ancient arks serve as evidence and as a blueprint.

The Knights Templar also possess the bones of Jesus Christ, Mary Magdalene, John the Baptist, and their combined children. Mary Magdalene was a high priestess originally married to John, and she later married Jesus after John was killed.

Tim also discusses the Templar knowledge of reincarnation aligning with Jesus Christ's original teachings, just as the Cathars understood. The Templars were originally founded by Albigensian Cathar families.

The Templars are storing the arks and these bones in a vault on a Native American reservation. They will open and reveal the vault to the world within the next 10 years, 2025 - 2035. They will broadcast this information globally through the Internet. The bones will undergo DNA testing, and the arks will be implemented as free energy technology globally, just as they were in Atlantis.

Here is a good introduction to Timothy Hogan's information:
